

Frequency generating device or life generating device!!

Well I have been using this device now since more than ten years. I have also recommended it to many of my friends and relatives who got positive results.

Let me talk about my personal experience. Many positive things are to be told for this amazing **life generating device**. You will appreciate the reason why I call it a **life generating device** when you read following testimony of mine:

My close friend's son had a history of some unknown virus attacking him regularly every six months after he attained age of 5 years. It was so severe that it attacked whole of his inside mouth down to larynx. Obviously he could not take food orally. So his frequent hospitalization was the only option.

Though doctors were also confused about the type of virus, they treated him for Herpes.

As he grew up, the attack became milder with the time.

One day he complained of whistling sound and sudden loss of hearing in one of his ears. He rushed to the local ENT only to be told to use hearing aid at the young age of 20 years. Confused and terrified my friend called me up. We decided to fly to Mumbai for second opinion. No hope as the doctors there agreed with the first opinion but promised us to give a try with steroids which could be given, as per medical science, not more than five days that too in a limited dose. So he was given steroids for five days with only negligible improvement. The hope was lost.

Well I had with me this frequency generating device in which of course the Drs. and my friend's family members would refuse to trust. But then I convinced my friend to give try as all other hopes were already lost. My friend agreed and I decided to target all types of herpes virus and hearing/ear related frequencies by this device during the night in absence of the Drs. and without their knowledge. You can see the progress below. A total severe hearing loss was lost. Hearing regained just in five rounds.

Kudos to Dr. Hemant Broker who introduced this device to me.

-- Ghanshyam Udhwani

Result after Day 1 of use of Frequency Device

HOLY FAMILY HOSPITAL.
AUDIOLOGY AND SPEECH THERAPY DEPT
DR. ALAN ANDRADE. DR. CHRIS DESOUZ
DR. PETER RODRIQUES. DR. D.M. BORKAR.
MS. SNEHA SATAM, MS. ARTI ARORA, MR. NIZAM.

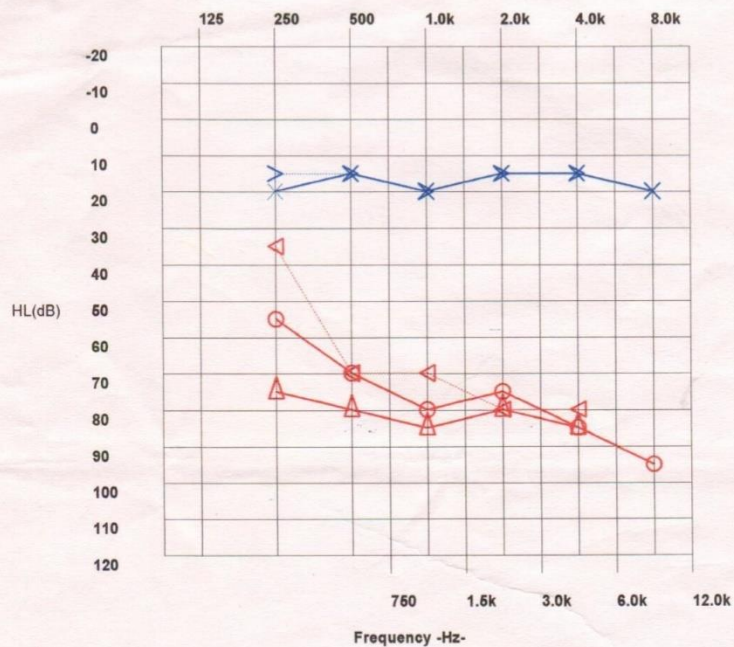

PATIENT'S NAME:-

Day - 1

AGE:- 19 SEX:- M

RECORD: C:\DOCUMENTS AND SETTINGS\AUDIOLOGY\MY DOCUMENTS\

Date:- 27/10/10

SYMBOL CHART

- X L-AC
- O R-AC
- > L-BC
- < R-BC
- L-AC[M]
- △ R-AC[M]
